

Safer Internet Day

On 10th February, we celebrated Safer Internet Day with a fantastic range of activities taking place across the whole school. The day was full of exciting learning opportunities, all centred around this year's focus on Artificial Intelligence (AI) and how to stay safe online.

We were delighted to welcome students from Bexley Grammar School, who delivered an engaging and informative assembly. They spoke to the children about what AI is, how it is used in everyday life, and most importantly, how to keep safe when using the internet. Their presentation was both insightful and inspiring, and our pupils asked some thoughtful questions.

Throughout the day, children across the school took part in a variety of activities exploring what AI is and discussing the many benefits it can bring. From understanding how AI helps with learning and problem-solving to considering how it is used in technology we see every day, the children showed great enthusiasm and curiosity.

We were also very lucky to welcome parent visitors who use AI in their jobs. They spoke to classes in Year 3, Year 4 and Year 5 about how AI supports their work and the different careers that use this technology. The children thoroughly enjoyed hearing real-life examples and were fascinated to learn how AI can be used in so many different professions.

It was a brilliant day of learning, discussion and discovery. The children loved taking part and represented the school wonderfully with their thoughtful contributions and positive attitudes.

Well done everyone!!
